Introduction and context

CSRD overview

**ESRS** - Introduction

ESRS I General Requirements

Annex I: Acronyms

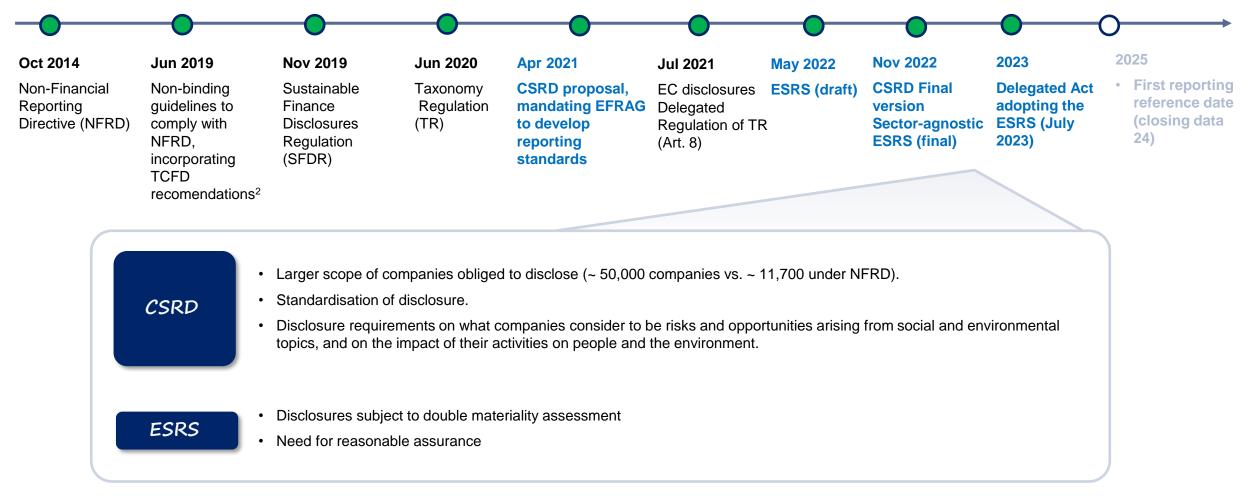

Annex 2: ESRS – Comparison with TCFD

Annex 3: About TCFD

Annex 4: About TNFD

### Introduction and context

The new corporate sustainability disclosure framework introduced by CSRD will be applicable for the first time to companies currently under NFRD by 2025 with data as of December 2024 as reference date. Final disclosure templates (ESRS) were published in July 2023

(1) EFRAG is a private association established in 2001 with the encouragement of the EC to serve the public interest. EFRAG extended its mission in 2022 following the new role assigned to EFRAG in the CSRD, providing Technical Advice to the EC in the form of fully prepared draft ESRS and/or draft amendments to these Standards.

ManagementSolutions Making things happen

(2) TCFD recommendations have been compared to the new ESRS in Annex I

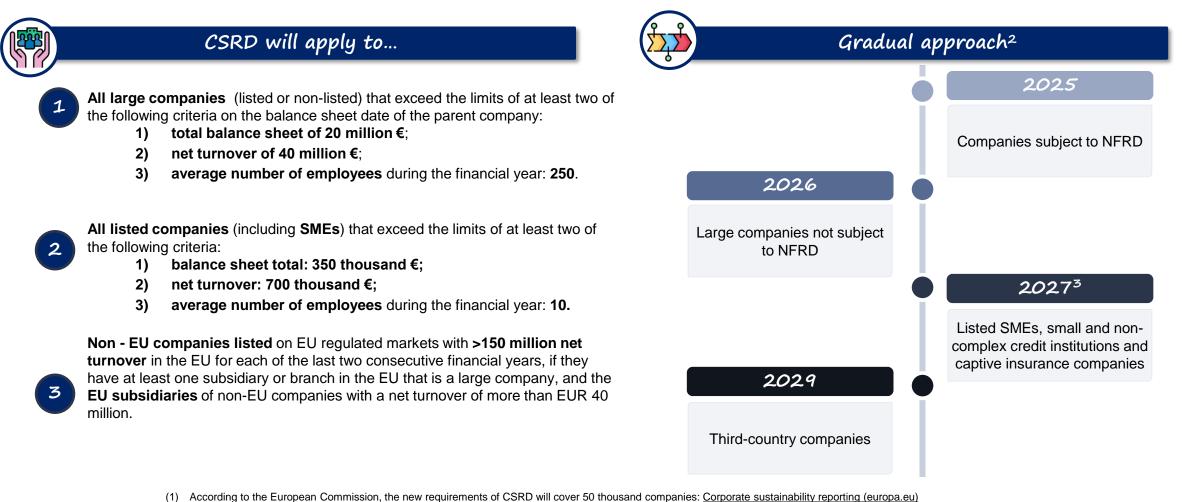

# 2 CSRD overview Main updates

CSRD revises and strengthens the existing rules introduced by NFRD in order to ensure that companies report reliable and comparable sustainability information needed by investors and other stakeholders

	NFRD	CSRD
What information shall be published?	Information related to: i) Environmental matters ii) Social matters and treatment of employees iii) Respect for human rights iv) Anti-corruption and bribery v) Diversity on company boards	<ul> <li>Same information, but with additional <u>mandatory</u> requirements, such as:</li> <li>Double Materiality</li> <li>Due diligence</li> <li>Description of GHG reduction targets at least to 2030 and preferably 2050</li> <li>Consideration of the short-medium and long term in the assessment of IRO</li> <li>Information disclosed in accordance with TR, Article 8</li> </ul>
Under which reporting standards?	Voluntary reporting framework	Mandatory New ESRS
Who shall publish?	• Large public-interest companies (> 500 employees), i.e. companies listed on EU regulated markets, banks, and insurance companies, as well as those designated by Member States as public-interest entities	<ul> <li>All large companies (listed and unlisted).</li> <li>All listed companies (including SMEs), except listed micro companies.</li> <li>Non-EU companies listed on regulated markets in the EU and EU subsidiaries of non-EU companies (more details on the next page).</li> </ul>
Is the <b>third-party</b> <b>assurance</b> mandatory?	<ul> <li>Auditors should verify that the non-financial report has been provided and, at the discretion of the NCA, the content of the non-financial report.</li> </ul>	<ul> <li>Requires limited assurance audit with gradual approach to reasonable assurance<sup>1</sup>.</li> </ul>
What kind of report/s and where to disclose?	<ul> <li>Non-financial statement in the management report. Separate report published with the management report and on the company's website (max. 6 months after the balance sheet date).</li> </ul>	<ul> <li>Mandatory sustainability statement in the management report. (max. 12 months after the balance sheet date).</li> <li>Statutory auditor's or audit firm's opinion and statement. Assurance standards to be defined.</li> <li>Member States may require publication of the management report on the company's website free of charge.</li> </ul>
In what format?	Online/PDF.	<ul> <li>Mandatory to be published in single electronic reporting format (XHTML).</li> </ul>

#### **CSRD** overview Companies under scope and timeline

CSRD will apply to a broader group of companies, estimates to approximately 50,000 companies in total<sup>1</sup>. The new rules will be adopted gradually by the companies, starting in 2025 by those that are already subject to the NFRD

Years corresponding to the first disclosure, maximum 12 months after the end of the previous financial year. (2)

For a transitional period of two years, possibility of opting-out from CSRD reporting requirements, provided they briefly state in their management report (3)

why the sustainability information has not been provided.

#### 4 ESRS 1 General Requirements Main disclosure requirements

The first section (ESRS 1 – General Requirements) establish the general requirements that companies must comply with when preparing and presenting sustainability-related information

*Material information* **o**n impacts, risks and opportunities in relation to ESG matters

Positive and negative impacts

*Sector-agnostic* applicable to all companies + *entity specific disclosures* that reflect the unique and specific situation of an entity

Covering direct and indirect relationships in the *upstream and downstream value chain* (real /estimated)

Impacts, risks and opportunities in relation to ESG matters should be disclosed. The information shall enable the understanding of the **company's impacts on those** impacts, risks and opportunities and how they affect the companies' **development**, **performance and position**.

The companies should **analyze and disclose both positive and negative** sustainable-related impacts.

There are other two requirements types:

- Sector-specific disclosure requirements applicable to all companies under CSRD/ESRS scope within a sector, currently under implementation.
- Entity-specific disclosures disclosures that are not covered with sufficient granularity, that reflect the unique and specific situation of an entity.

Material impacts, risks and opportunities related to **direct and indirect relationships** of the company in the **upstream and/or downstream value chain** should be disclosed. If the company is not able to collect the information on upstream and downstream value chain, it should be estimated using sector-average data and other proxies.

() ◆()

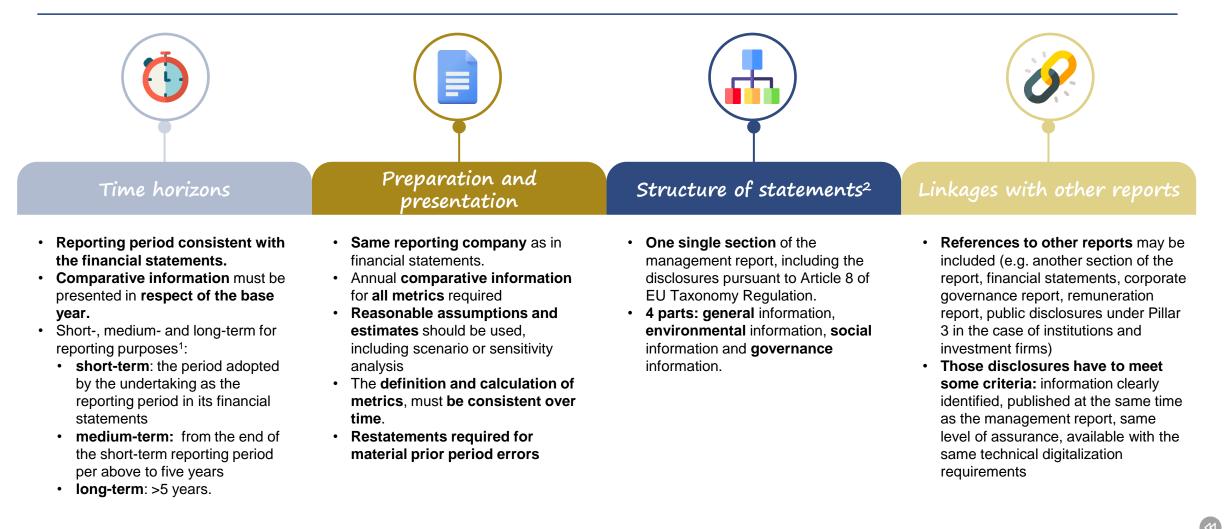

Transitional period for the first 3 years 1) entity-specific disclosure; 2) value chain information

Companies may adopt **transitional measures for preparation** of some information: 1) entity-specific disclosure; 2) value chain information (if required information is not available, the company should explain the reasons and plans to obtain it in the future).

Management Solutions Making things happen

#### 4 ESRS 1 General Requirements Form requirements

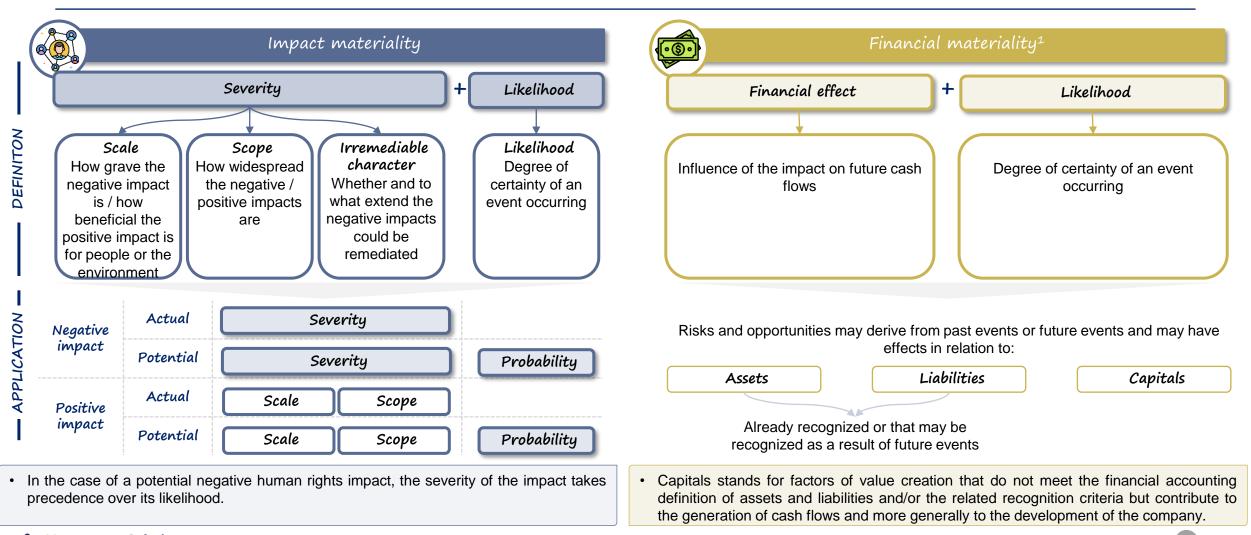

When preparing its sustainability statements, the company must apply some requirements related to form of the reports: time horizons, presentation, structure and relation with other reports

If different definitions of medium- or long-term time horizons are required for specific items of disclosure in a topical or sector specific ESRS, the definitions in the [draft] topical or sector specific ESRS prevail.

#### 4 ESRS 1 General Requirements Double materiality (1/2)

Double materiality has two dimensions: impact materiality and financial materiality; their assessments are inter-related and the interdependencies between the two dimensions shall be considered

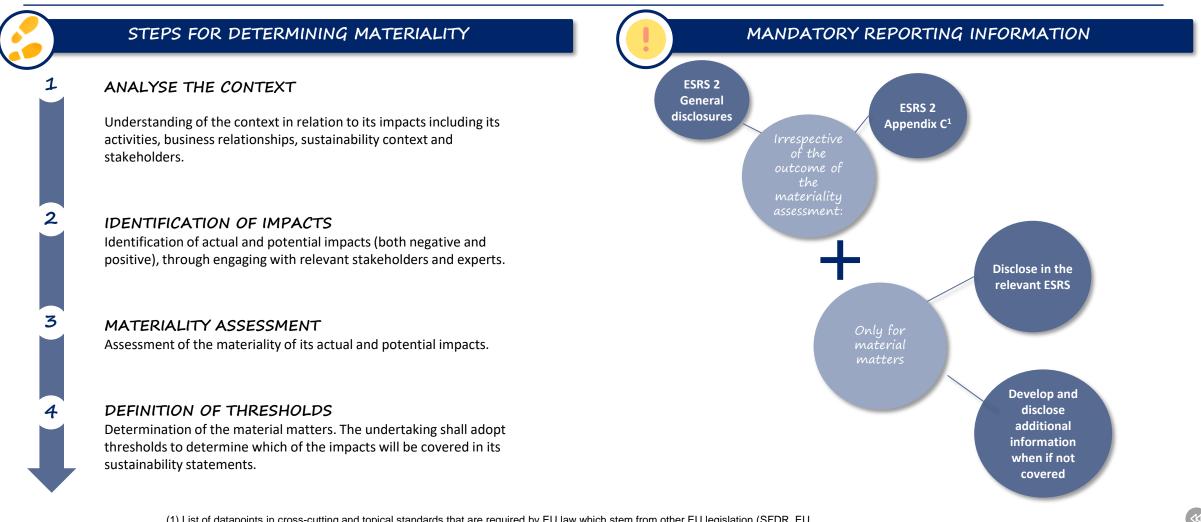

Making things happen (1) The materiality perspective of the Non-Financial Reporting Directive covers both financial materiality and impact materiality (environmental and socia), whereas the TCFD considers a financial materiality perspective only

#### 4 ESRS 1 General Requirements Double materiality (2/2)

A sustainability matter is "material" for the company when it meets the criteria defined for impact materiality or financial materiality or both

(1) List of datapoints in cross-cutting and topical standards that are required by EU law which stem from other EU legislation (SFDR, EU Benchmarks, Pillar III, EU Climate law ..)

CSRD	Corporate Sustainability Reporting Directive
EC	European Commission
ESG	Environmental, social, and corporate governance
EFRAG	European Financial Reporting Advisory Group
ESRS	European Sustainability Reporting Standards
GHG	Green House Gas
IRO	Impact, risk and opportunity
NCA	National competent authority
NFI	Non-Financial Information
NFRD	Non-Financial Reporting Directive
SME	Small and medium-sized enterprises
TCFD	Task Force on Climate-Related Financial Disclosures
TR	Taxonomy Regulation

#### Annex 2: ESRS Comparison with TCFD

When comparing TCFD<sup>1</sup> and ESRS it is important to point out that TCFD recommendations focus on climate change related disclosure while ESRS's scope is much broader, covering other ESR topics

	E	ESRS content	Comparison TCFD		
Cross-cu standa	$\sim$	ESRS 1 General requirements ESRS 2 General disclosures	N/A	GOVERNANCE ESRS 2 covers embeds TCFD

#### Annex 3: About TCFD

TCFD recommendations provide guidance on how to report climate-related financial disclosures. These define four categories of recommendations to be applied in all organizations, including financial information related to governance, strategy, risk management and indicators and objectives

# TNFD's new disclosure recommendations have been aligned with those issued by TCFD in an effort to facilitate and promote a transition towards integrated disclosure

	Recommended disclosures								
Governance	A. Describe the board's oversight of nature-related dependencies, impacts, risks and opportunities.	B. Describe management's role in assessing and managing nature-related dependencies, impacts, risks and opportunities	C. Describe the organisation's human rights policies and engagement activities, and oversight by the board and management, with respect to Indigenous Peoples, Local Communities, affected and other stakeholders, in the organisation's assessment of, and response to, nature-related dependencies, impacts, risks and opportunities.						
Strategy	A. Describe the nature-related dependencies, impacts, risks and opportunities the organisation has identified over the short, medium and long term .	B. Describe the effect nature-related dependencies, impacts, risks and opportunities have had on the organisation's business model, value chain, strategy and financial planning, as well as any transition plans or analysis in place.	C. Describe the resilience of The organisation's strategy to nature-related risks and opportunities, taking into consideration different scenarios	D. Disclose the locations of assets and/or activities in the organisation's direct operations and, where possible, upstream and downstream value chain(s) that meet the criteria for priority locations.					
Risk and Impact management	A(i) Describe the organisation's processes for identifying, assessing and prioritising nature-related dependencies, impacts, risks and opportunities in its direct operations.	A(ii) Describe the organisation's processes for identifying, assessing and prioritising nature-related dependencies, impacts, risks and opportunities in its upstream and downstream value chain(s)	B. Describe the organisation's processes for managing nature-related dependencies, impacts, risks and opportunities .	C. Describe how processes for identifying, assessing, prioritising and monitoring nature-related risks are integrated into and inform the organisation's overall risk management processes.					
Metrics and targets	A. Disclose the metrics used by the organisation to assess and manage material nature-related risks and opportunities in line with its strategy and risk management process	B. Disclose the metrics used by the organisation to assess and manage dependencies and impacts on nature .	C. Describe the targets and goals used by the organisation to manage nature-related dependencies, impacts, risks and opportunities and its performance against these.
